

CALL FOR PROPRIETARY PRESENTATIONS/DEMONSTRATIONS

ACEA Symposium – April 18, 2012

Construction and Engineering Methods

Project design and construction within the Central Texas area hosts a number of different permitting, engineering and construction solutions to common project issues. In addition, engineering and construction solutions have developed quickly within the past few years, and now incorporate new technologies and equipment which could benefit developers. At the same time, however, engineering and construction methods have changed little to incorporate these solutions and bring about cost and time savings to current and future projects.

During the ACEA Symposium, many sessions are dedicated to what we as a committee believe to be the most prevalent issues of the time. We have also come to realize that there are other valuable topics and methodologies that others are able to discuss during a session. This dialogue may bring about increased value to members' current and future clients. For this reason, we have decided to open up several sessions in the 2012 Symposium for qualified presentations or demonstrations.

The full one hour session should be broken into about 45 minutes of presentation with a 15 minute question & answer period toward the end. There are a limited number of sessions available, so each submission will be reviewed by the Symposium Committee for its applicability to current construction or design issues. These sessions can contain proprietary products and solutions.

Topics suitable for this Session include, but are not limited to:

- Alternative Methods for Water Quality
- Retaining Wall Systems and Their Use
- Rehabilitation of Existing Utility Systems
- Environmental Impact Mitigation (Erosion Control Systems)
- Pipe or Manhole Tapping Demonstrations
- Construction Technology Advances

Deadline for Submission: 5 PM on December 20 , 2011

Cost of Session upon Selection: \$500

Submission Procedure:

To submit your topic, please provide a **one page** narrative description per topic, indicating information that will be explained, how it is vital to the attendees and any other pertinent info necessary for the selection committee to determine if the topic is beneficial for the 2012 Symposium. Please include contact information and any special requests (i.e. power or large space requirements).

This information is to be sent electronically in a PDF format file to: michele.yule@aceatx.com
